ABOUT ME

I am a full-stack software developer specializing in front-end web and mobile development, particularly in React and React Native. I have experience working both in teams and independently, consistently meeting established objectives and deadlines while focusing on continually improving product quality.

My primary role in the projects I've worked on has been UI programming for websites and mobile applications. I use tools like React, React Native, CSS, TSX, MST, Firebase, AWS, and Figma, enabling me to create high-quality products that meet user needs.

I am committed to staying updated on the latest development technologies and practices to continuously enhance my skills and offer innovative and effective solutions. As a software developer, I am passionate about creating exceptional products and am excited to tackle new challenges in the future.

EXPERIENCE

React & React Native Developer

Hybeans [Web App](#) - [IOS App](#) - [Android App](#)

May 2022 - Present, Argentina

- Contributed to the development of various key features of the application, including login, password recovery, account validation, multiple profile types, feeds, chats, notifications, configuration menus, reservations, product sales, hiring, and tour generation using map services.
- Responsible for UI programming using tools like React, React Native, MST, and Figma, resulting in a high level of quality and an intuitive user experience.
- Developed a section dedicated to managing tournaments at sports facilities, including standings, cautions, MVPs, fixtures, and more, which was well-received by the application's users.
- Developed an administration panel that included managing product lists, sales, order processing, and reservations.
- Worked closely with the development team to ensure established objectives were met, and project delivery deadlines were maintained.
- Identified and resolved technical issues, ensuring the stability and performance of the application.

- Implemented new technologies and methodologies in the development process, increasing efficiency and product quality.
- Collaborated with other departments in the company, such as the design and testing teams, to ensure the application met established quality and usability standards.

EDUCATION

Higher Technicature in Computer Science

Universidad Nacional de General Sarmiento - Buenos Aires, Argentina

Diploma in Java Programming

Universidad Tecnológica Nacional - Buenos Aires, Argentina

SKILLS

- **Advanced knowledge of React and React Native:** Ability to build reusable and performance-optimized components.
- **Mastery of fundamental HTML, CSS, and JavaScript concepts:** Capability to write clean and semantic code.
- **Experience in real-time application development:** Proficient with Firebase Realtime Database and managing real-time changes in applications.
- **Comprehensive use of Firebase:** Including Firestore for database management, user authentication, and push notification integration
- **Knowledge of Git:** Proficient in working with remote repositories and managing version conflicts.
- **Understanding of React or React Native application architecture:** Ability to design and maintain an organized and scalable folder structure.
- **User experience optimization:** Develop and maintain an optimized and accessible user experience using accessibility techniques and responsive design.
- **Team collaboration skills:** Using project management tools and communication platforms like Jira and Slack.
- **Quick learning and adaptation:** Capable of quickly learning and adapting to new technologies and tools in mobile and web application development.
- **Effective problem analysis and resolution:** Skilled in analyzing and resolving issues in software development.
- **Effective communication and collaboration:** Strong skills in building positive connections and fostering a collaborative work environment with team members, clients, and stakeholders.
